PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in designing, developing, and maintaining web applications from end to end. Experienced in building scalable backend services using Express.js, NestJS, Laravel, and MySQL, as well as developing responsive frontend applications with React.js. Skilled in REST API development, database design, Linux server administration, Docker, CI/CD, and deploying production applications on VPS environments. Passionate about learning new technologies, solving complex technical problems, and building reliable software solutions in collaborative teams.

PROFESSIONAL EXPERIENCE

IT Specialist & Full Stack Developer - PT Trainers Management Indonesia

Fulltime | **May 2026 – Present**

- Plan, develop, and maintain the company's IT infrastructure to support secure and efficient business operations.
- Developed Halo AI, an AI-powered solution to improve customer service responsiveness and service quality.
- Designed, deployed, and maintained Linux VPS servers for production applications.
- Implemented GitHub Actions to automate frontend build and deployment processes.
- Collaborated with external vendors to ensure successful implementation of internal projects.
- Developed and maintained the company's website to support ISO 9001 documentation requirements.
- Provided technical support, monitored system performance, and evaluated existing IT systems.

IT and Web Innovation - PT Trainers Management Indonesia

Internship | **November 2025 – May 2026**

- Improved website performance by implementing page caching mechanisms to reduce rendering time.
- Participated in planning and implementing departmental technology initiatives.
- Designed an internal management system to replace legacy workflows.
- Developed web-based systems to support participant and operational data management.
- Conducted Halo AI training sessions for the Marketing & Sales division, improving customer response efficiency.
- Researched and implemented new technologies for software development.
- Produced REST API documentation for internal development teams.
- Designed branding assets and visual identities for LMS and LSP projects.
- Coordinated with external vendors throughout project execution.

Backend Developer - PT Sadaya Teknologi Indonesia

Part-Time | **December 2025 - Saat ini**

- Participated in system architecture and technology selection.
- Collaborated with cross-functional teams to align technical solutions with client requirements.
- Discussed project workflows and system specifications during development meetings.
- Designed and maintained relational database structures.

Backend Developer - PT Linkdataku Solusi Indonesia (MAXY ACADEMY)

Internship – MSIB Batch 7 | **September 2024 - December 2024**

- Led collaboration across UI/UX, Frontend, Backend, and Marketing teams.
- Developed web applications using Laravel MVC architecture.
- Designed and managed MySQL relational databases and database migrations.
- Collaborated on a capstone project based on a real business case.
- Managed task distribution to ensure timely project completion.

Backend Developer - Universitas Pelita Bangsa

Project-Based / Freelance | **September 2023 - June 2024**

- Designed and developed RESTful APIs for internal systems.
- Worked closely with developers to ensure successful system integration.
- Participated in system architecture discussions.
- Designed and maintained database structures.
- Produced technical documentation for REST APIs.

PROJECTS

RFID-Based Student Attendance System

Express.js, React.js, MySQL, Tailwind CSS, Arduino

- Developed a web-based student attendance system integrated with RFID technology for automated attendance recording.
- Designed RESTful APIs and relational database schema to manage students, attendance records, and reporting.
- Implemented authentication, attendance reports, and dashboard features to improve administrative efficiency.

Bus Management System

Codeigniter, React.js, Tailwind CSS, MySQL

- Built a full-stack bus ticket reservation platform with booking, seat management, and route scheduling features.
- Designed relational database structures and developed RESTful APIs for reservation and transportation management.
- Implemented secure authentication and optimized backend workflows for better system performance.

Tracking.id (RBAC)

Laravel.js, Bootstrap, MySQL

- Developed a Role-Based Access Control (RBAC) dashboard for managing users, roles, and permissions.
- Implemented secure authentication, authorization, and activity monitoring features.
- Collaborated with a multidisciplinary team to deliver the project based on business requirements..

EDUCATION

UNIVERSITAS PELITA BANGSA

Bachelor of Computer Science (B.Sc. in Informatics) | **2021 - 2025**

- **GPA : 3.75 / 4.00**
- **Final Project : Design and Development of an RFID-Based Student Attendance System Using the Prototyping Method**

TEMPAT BELAJAR

- Professional Business Development Bootcamp Batch #13 | June 2026 – Present

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, PHP, Go

Framework: ExpressJS, NestJS, Laravel, CodeIgniter

Database: MySQL, PostgreSQL

DevOps: Docker, Git, CI/CD, SSH, Linux CLI

Tools: Postman, Figma, Microsoft Office, Canva, ChatGPT

Languages: Indonesian (Native), Inggris (Basic)

CERTIFICATIONS

- [General Occupational Safety and Health Expert \(KEMNAKER RI\)](#)
- Assistant Web Developer – BNSP (Valid: 2026 - 2029)
